## MAXFlow Upgrade Kit for Twin Cam Style Cover

Is your bike already equipped with a factory Stage I performance air cleaner? *Raise the level another step!*

Our MAXFlow Stage I Upgrade Kit includes a specially designed, 100% washable pleated fabric filter made from multiple layers of surgical-quality cotton gauze material that traps the smallest dirt particles while providing dramatic flow increases. The element is 5/8" deeper than the factory performance filter it is designed to replace yielding over 60% more surface area than the Stage I filter. The kit includes required longer mounting hardware. 5-1/2"

end diameter at cover mating surface. Takes about 5 minutes to install - *the difference is immediately noticeable!*

*Note - This kit is designed to be used on Twin Cam® engines equipped with H-D® Screamin' Eagle® Stage I air cleaner and the standard Twin Cam® "football" cover, which makes 360° contact between the cover back and the rubber gasket on the filter. Do not install decorative cover inserts (due to increased weight) or use with 2006-up CVO Touring model oval covers that do not make 360° contact between the cover back and the rubber gasket. 2008-up Dyna® models require the separate purchase of HD # 29591-99 gasket for use with factory teardrop air cleaner cover.*

### Covers for MAXFlow Air Cleaners, TC Style

Customize your MaxFlow air filter with one of these billet chrome lids (filter element exposed). *Click on the part number to order on-line!*

- | Part No. | Description  |
|----------|--|
| #172-780 | 5-1/2" round open air filter cover, chrome smooth    |
| #172-781 | 5-1/2" round open air filter cover, chrome scalloped |

## MAXFlow Upgrade Kit for EVO Style Cover

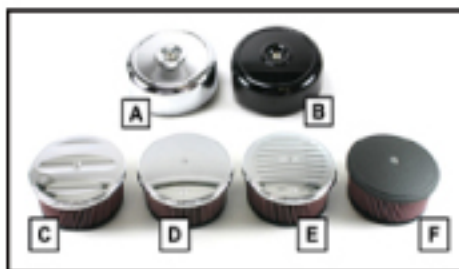

These kits are very similar to the Twin Cam® MaxFlow upgrade kits listed above except they are designed with the filter tapering outward towards the air filter cover, allowing use of 8" diameter EV-style round covers. Can be used on Evolution® or Twin Cam® engines if the appropriate EV-style cover is used. Specially designed 7" O.D. filter increases air flow while reducing intake turbulence. Includes air filter and required mounting hardware. 7" end diameter at cover mating surface. *Click on the part number to order on-line!*

**Part No. Description**  
**#162-295** Fits carburetor Evolution 80" engines equipped with H-D #29543-99 Screamin' Eagle® ('99-up design) air filter kit. This Screamin' Eagle® air filter uses the newer style die-cast backplate with venturi built-in and 3 separate mounting studs. Also fits Twin Cam® with carb or cable-operated Delphi® EFI models when used with 8" round cover (purchase separately).

**#162-294** Fits carburetor EV 80" engines equipped with H-D #29008-90A Screamin' Eagle® (pre-'99 design) air filter kit. This Screamin' Eagle® air filter uses the earlier style flat backplate with 3 threaded studs attached and a plastic venturi ring

**#162-297** Fits '99-'01 Marelli fuel injected TC engines equipped with H-D #29441-99 Screamin' Eagle® air filter kit (4-bolt mounting). Requires round Evolution type cover (purchase separately).

### Covers for MAXFlow Air Cleaners, EVO Style

Customize your MaxFlow air filter with one of these EVO style lids (some full cover, expose air filter). *Click on the part number to order on-line!*
